ABOUT

Curious and driven, I enjoy exploring new ideas, building meaningful projects, and taking on challenges that push me to grow. My journey blends technical learning with hands-on experiences in leadership, teamwork, and creative problem solving. I value adaptability, clear communication, and a mindset that sees every opportunity as a chance to learn and contribute.

EDUCATION

Chinmaya International Residential School

April 2008 – March 2023

Amrita Vishwa Vidyapeetham

Expected to May 2027

WORK EXPERIENCE

AI Intern — Guhatek

April 2026 -Now

- Currently working with the AI/ML team to develop and support automation solutions, improving efficiency across workflows and systems.
- Supporting development of machine learning models, APIs, and data pipelines for scalable systems.
- Assisting in building scalable applications and deploying solutions in cloud-native environments.

Intern — Inscribe Graphics

May - June 2025

During this internship at Inscribe Graphics, I worked across multiple design teams where I created vector illustrations, tags, labels, and sportswear artwork using Adobe Illustrator. I also learned the technical side of how design files move across Networks, including LAN-based workflow systems used in production environments. This internship also gave me exposure to working with a client and strengthened my teamwork, communication, and time-management skills.

PROJECTS

GitHub Q&A Assistant (SLM-RAG)

March - April 2026

- Built a **local-first Retrieval-Augmented Generation (RAG)** system to answer technical queries from GitHub repositories using **Small Language Models**.
- Engineered a data pipeline for code understanding, including **Syntax-Aware Chunking** and **Vector Embeddings** for efficient retrieval.
- Deployed a scalable Kubernetes-based system with **Helm** and implemented **readiness probes** to handle model warm-up reliability

Humanoid Robot for Intelligent Outpatient Flow Management

August - October 2025

- Engineered an **Intelligent Queue Management System** for outpatient care, streamlining flow for **500+ patients/month** and improving clinic efficiency by **20%**
- Integrated **8 subsystems** (biometric facial recognition, conversational engine) using a **dual-processor setup (STM32 + Raspberry Pi 4)** .
- Built a **context-aware emergency detection module** using **IMU and camera sensors**, achieving **95% alert accuracy** in simulated tests

Blockchain-Ledger System

January - February 2025

- Developed a **blockchain ledger system** with an interactive GUI using **PySimpleGUI**
- Implemented secure transactions using **SHA 256, digital signatures, Merkle tree**, and mining mechanisms
- Applied **hashing, cryptographic signing**, and decentralized record-keeping to ensure data integrity, transparency, and immutability .

INTERESTS & SKILLS

Interests: AI-driven automation, Finance & Stock Market Trends, Data-Driven Decision Making, Supply Chain

Technical Skills: Python, SQL, DSA, Machine Learning, NLP, Time-Series Analysis, FastAPI, Pandas, LangChain, GIT, NumPy, Scikit-learn, PyTorch, Communication

Language Fluency: English, Tamil, Kannada, Hindi

EXTRACURRICULAR ACTIVITIES

NCC-National Cadet Corps

May 2018 – March 2020

- Participated in the school NCC battalion for two years, demonstrating discipline and leadership.
- Successfully cleared the NCC 'A' Certification exam, showcasing commitment and proficiency
- Completed 213 hours of community service - SEVA , contributing to various social initiatives.
- Actively played the trumpet as a member of the school band, enhancing teamwork.

MUN-Model United Nations

Sept. 2017 – May 2022

I have actively participated in various Model United Nations (MUN) conferences, including CHEMUN and IIMUN, where I represented different countries and engaged in policy discussions. Through collaborating with delegates, analyzing global issues, and proposing effective solutions, I strengthened my communication, critical thinking, and negotiation skills.
