ABOUT

Curious and motivated Computer Science Engineering student specializing in AI and data-driven problem-solving. My journey blends technical proficiency with leadership and teamwork experience to deliver impactful, scalable solutions. I value adaptability, clear communication, and a mindset that sees every opportunity as a chance to learn and contribute.

EDUCATION

Chinmaya International Residential School

March 2023

CBSE - Higher Secondary

Amrita Vishwa Vidyapeetham

Aug 2023 – May 2027

BTech Computer Science Engineering

WORK EXPERIENCE

AI Intern — Guhatek

April 2026 - June 2026

- Worked with the AI/ML team to develop and support automation solutions, improving efficiency across workflows and systems.
- Supported development of machine learning models, APIs, and data pipelines for scalable systems.
- Assisted in building scalable applications and deploying solutions in cloud-native environments.

Intern — Inscribe Graphics

May - June 2025

- Designed custom vector illustrations, tags using Adobe Illustrator, collaborating directly with clients and cross-functional design teams to deliver tailored solutions.
- Operated LAN-based workflow systems to efficiently route design files across networks within a fast-paced production environment.

PROJECTS

GitHub Q&A Assistant (SLM-RAG)

March - April 2026

- Built a **local-first RAG system** that reduced technical query resolution time by 40%, achieving **average response times of 3.5 seconds** through post-training model quantization.
- Engineered a data pipeline for code understanding, **indexing over 45,000+ lines** of code across 15+ GitHub repositories using **Syntax-Aware Chunking**.
- Deployed a scalable Kubernetes-based system with **Helm** and implemented **readiness probes** to handle model warm-up reliability

Humanoid Robot for Intelligent Outpatient Flow Management

August - October 2025

- Engineered an **Intelligent Queue Management System** for outpatient care, streamlining flow for **500+ patients/month** and improving clinic efficiency by **20%**
- Integrated **8 subsystems** (biometric facial recognition, conversational engine) using a **dual-processor setup (STM32 + Raspberry Pi 4)** .
- Built a **context-aware emergency detection module** using **IMU and camera sensors**, achieving **95% alert accuracy** in simulated tests

Blockchain-Ledger System

January - February 2025

- Simulated a **decentralized network** of 5 virtual nodes, processing secure transactions using **SHA-256 and digital signatures**.
- Engineered a secure blockchain ledger using Merkle trees for **100% data immutability**, integrated with a custom **PySimpleGUI dashboard** for real-time tracking

INTERESTS & SKILLS

Interests: AI-driven automation, Data Engineering, Machine Learning, Cloud Computing, LLMs, FinTech.

Technical Skills: Python, SQL, DSA, NLP, Time-Series Analysis, FastAPI, Pandas, LangChain, GIT, NumPy, Scikit-learn, PyTorch, Docker, Kubernetes.

Language Fluency: English, Tamil, Kannada, Hindi

EXTRACURRICULAR ACTIVITIES

NCC-National Cadet Corps

May 2018 – March 2020

As a two-year member of the school NCC battalion, I demonstrated dedication and leadership by earning my **NCC 'A' Certification**. I balanced my cadet responsibilities with a strong commitment to community welfare by **completing 213 hours of SEVA social initiatives**, while also fostering teamwork as an active trumpet player in the school band)

MUN-Model United Nations

Sept. 2017 – May 2022

I have actively participated in various Model United Nations (MUN) conferences, including **CHEMUN** and **IIMUN**, where I represented different countries and engaged in policy discussions. Through **collaborating with delegates, analyzing global issues, and proposing effective solutions**, I strengthened my communication, critical thinking, and negotiation skills.
